Facia plate 2-DIN and HU Adapter Kit Seat / Skoda / VW

Many car manufacturers install car specific head units to fit the optical picture of the dashboard.

Installation kits include all components for replacing an OEM HU.

Depending on the vehicle's equipment, all adapters and interfaces required to operate the retrofit device and restore vehicle functions are included in the scope of delivery.

Please check the installation recommendations for the individual components.

In some cases, not all vehicle functions are supported.

For example, Trailer Assist, E Call, or other driver assistance systems.

Please check the OEM HU and vehicle settings for available settings before installation.

Please check all functions before final installation.

Also check our listed OEM head units and compare the pictured harness connectors with the connectors in your car and make sure that they fit optically and technically.

Note:

CAN Bus

connector: 40 Pin Quadlock VW

connector: Fakra(m) > DIN/ISO

under circumstances modifications of the facia are necessary
