?????. ????. ???????? Opel (Fakra Quadlock)

**CAN-Bus Kit Opel / Renault Quadlock ->  
Power + Speaker (ISO) + DIN Antenna connector**

If the OEM HU is to be replaced by an aftermarket HU in a vehicle controlled by CAN bus, a specific CAN bus adapter is required.

Specific as well as universal CAN bus adapters convert relevant digital data of the respective vehicle-specific data bus into analogue signals. Depending on the adapter, various signals or comfort functions such as ignition plus, lighting, reverse gear signal or even a speed signal are read out and made available in analogue form for various retrofit solutions.

**General installation instructions:**

Connections, connection changes, alternative connections, connections of loose cables or connection extensions of loose cables specified in the information text or the manual are for orientation purposes only and for the information of trained specialist installer.

Connections, changes to the cable configuration of the wiring harness or use of alternative connections or connection extensions:

- 1: Connections and changes are to be carried out exclusively by trained specialist installer.
- 2: Connections and modifications must be checked before connection for any manufacturer approvals or manufacturer warranty conditions that may be affected by the modifications.
- 3: Connections and modifications must be checked for function and correctness by measuring and comparing them with the vehicle's cable assignment diagram before connection.
- 4: Connections and modifications are made on the user's own responsibility without guarantee of function.
- 5: Connections and modifications are made on the user's own responsibility without any guarantee of damage to the vehicle, the retrofit device or the interface.
- 6: Modifications to the pre-assembled wiring harness may invalidate the product's warranty.
